The dataset prepared of sales across year, spesificly from 2003 until 2004 with the time information, IDs, Customer Information and various product category. The detail of the data can be access with barcode above

Questions

Identify the total sales for each year. which year had the highest total sales?

Which country has the highest sales of classic cars throughout 2004?

Which product line was sold the most (in quantity) throughout september 2003 to march 2004?

Objectives

Examine the structure of the dataset

Understand the type and characteristics of the data.

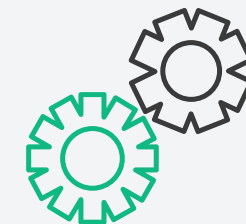

Identify key patterns

Detect trends, similarities, or differences.

Generate useful insights

Extract meaningful information.

Present results clearly

Communicate findings effectively.

Question 1:

identify the total sales for each year. which year had the highest total sales?

Question 1:

identify the total sales for each year. which year had the highest total sales?

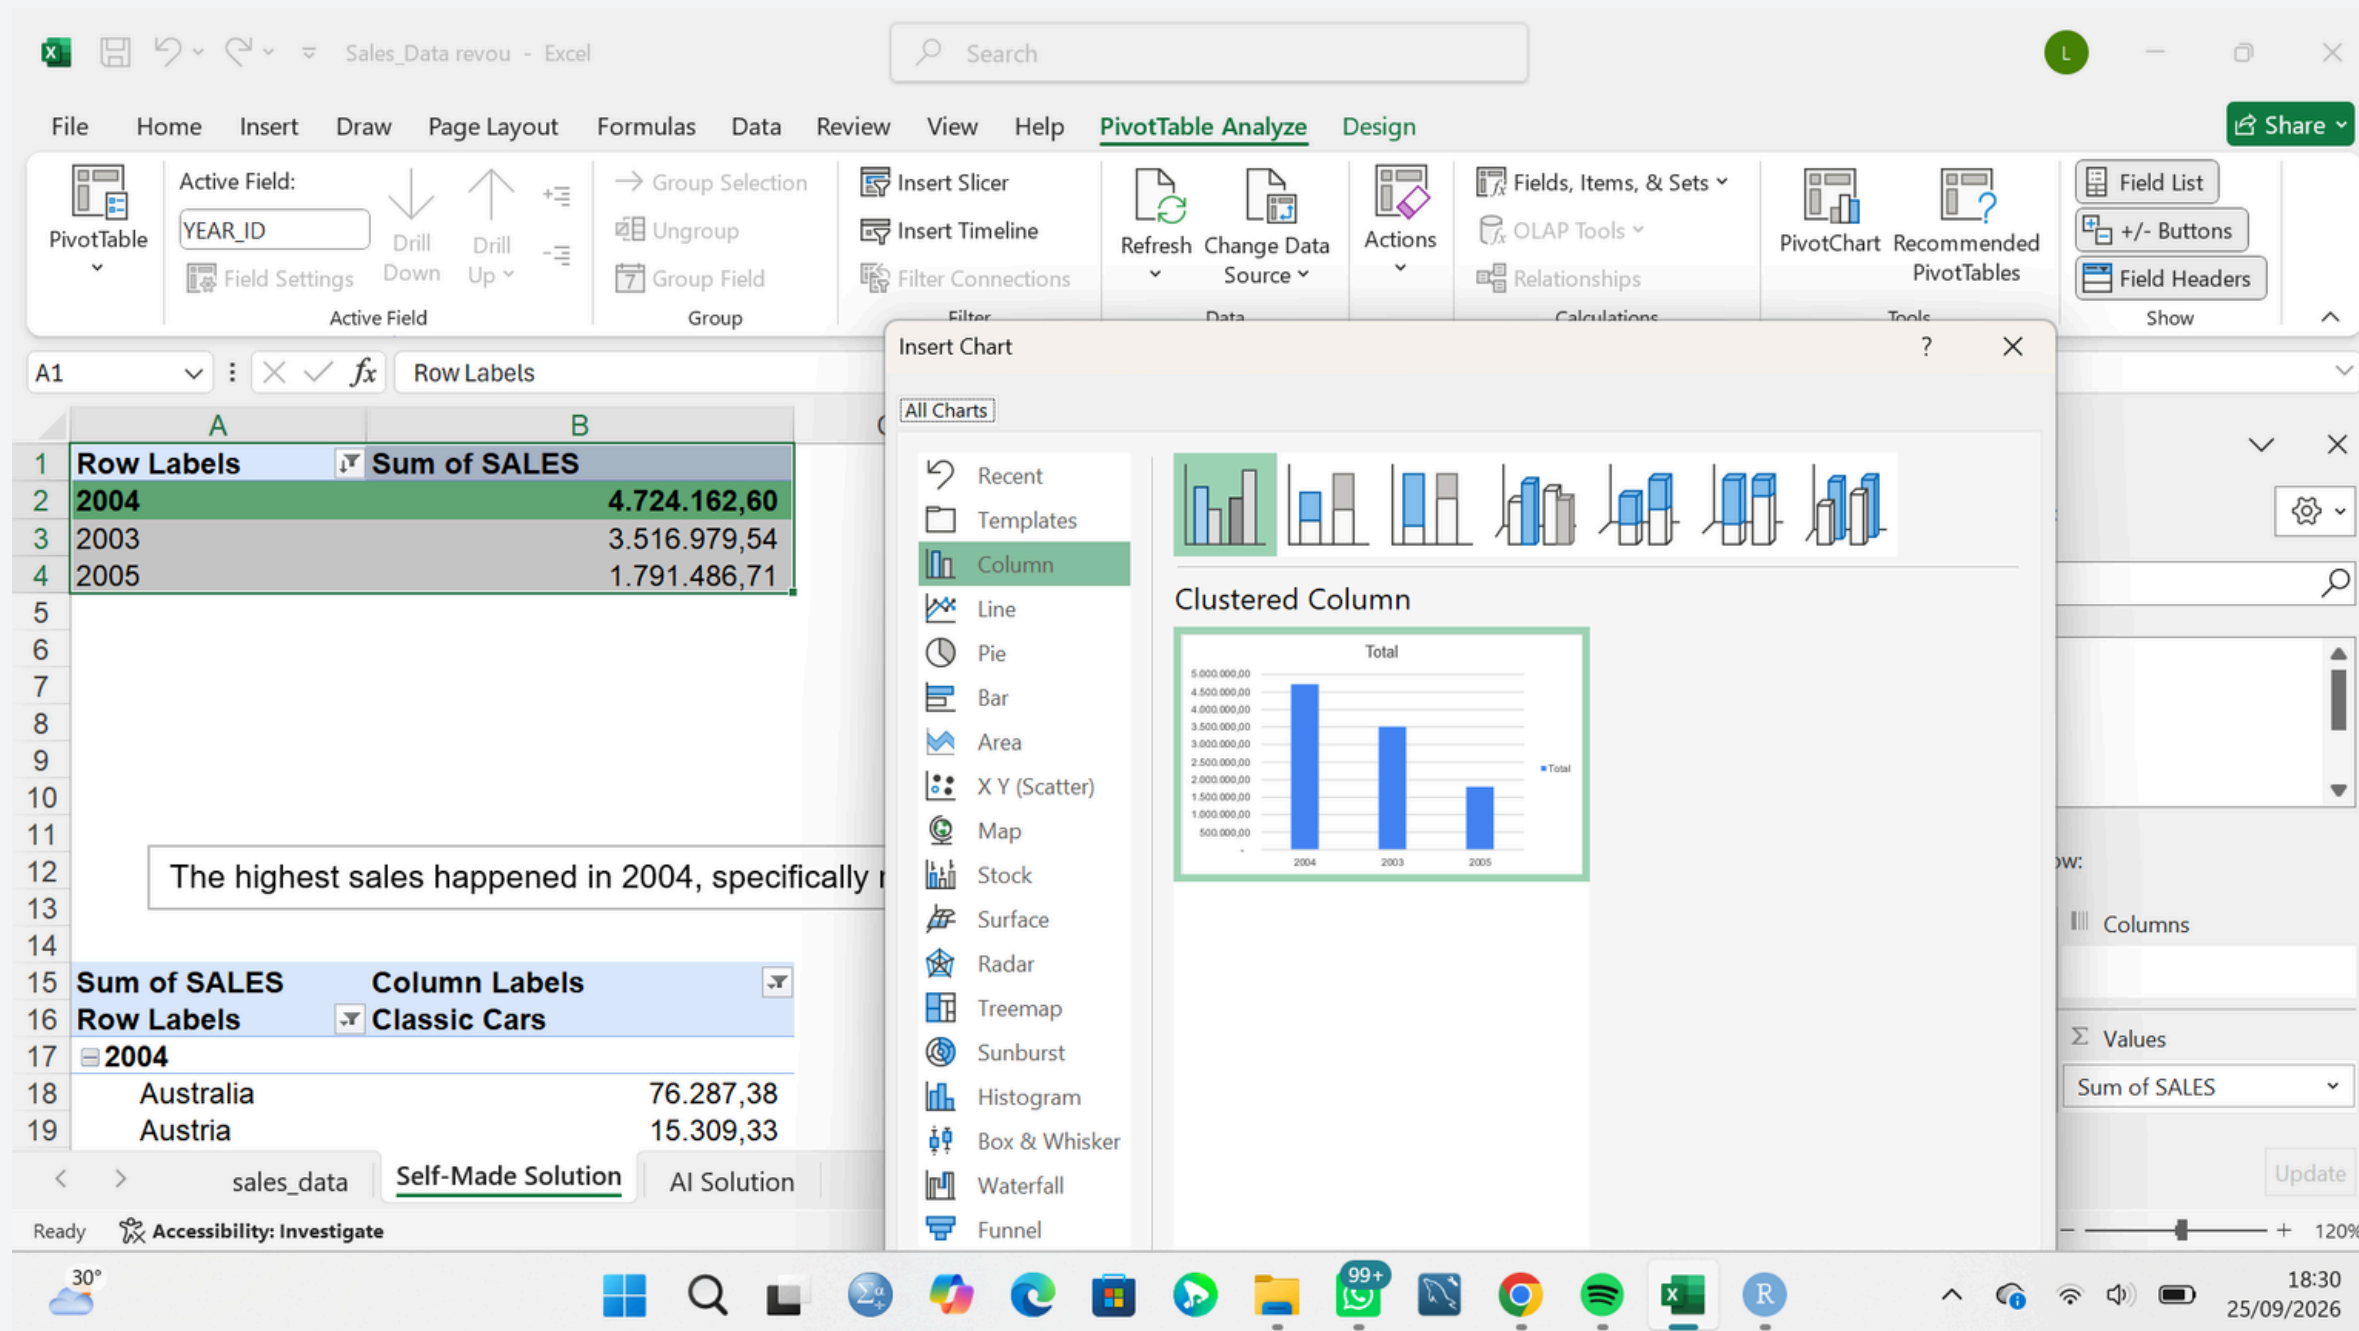

Choose the data column (based on the question) into these pivot segments, especially for row and value part

Because the question mentioned year and sales, both columns were included into the pivot part

Question 1:

identify the total sales for each year. which year had the highest total sales?

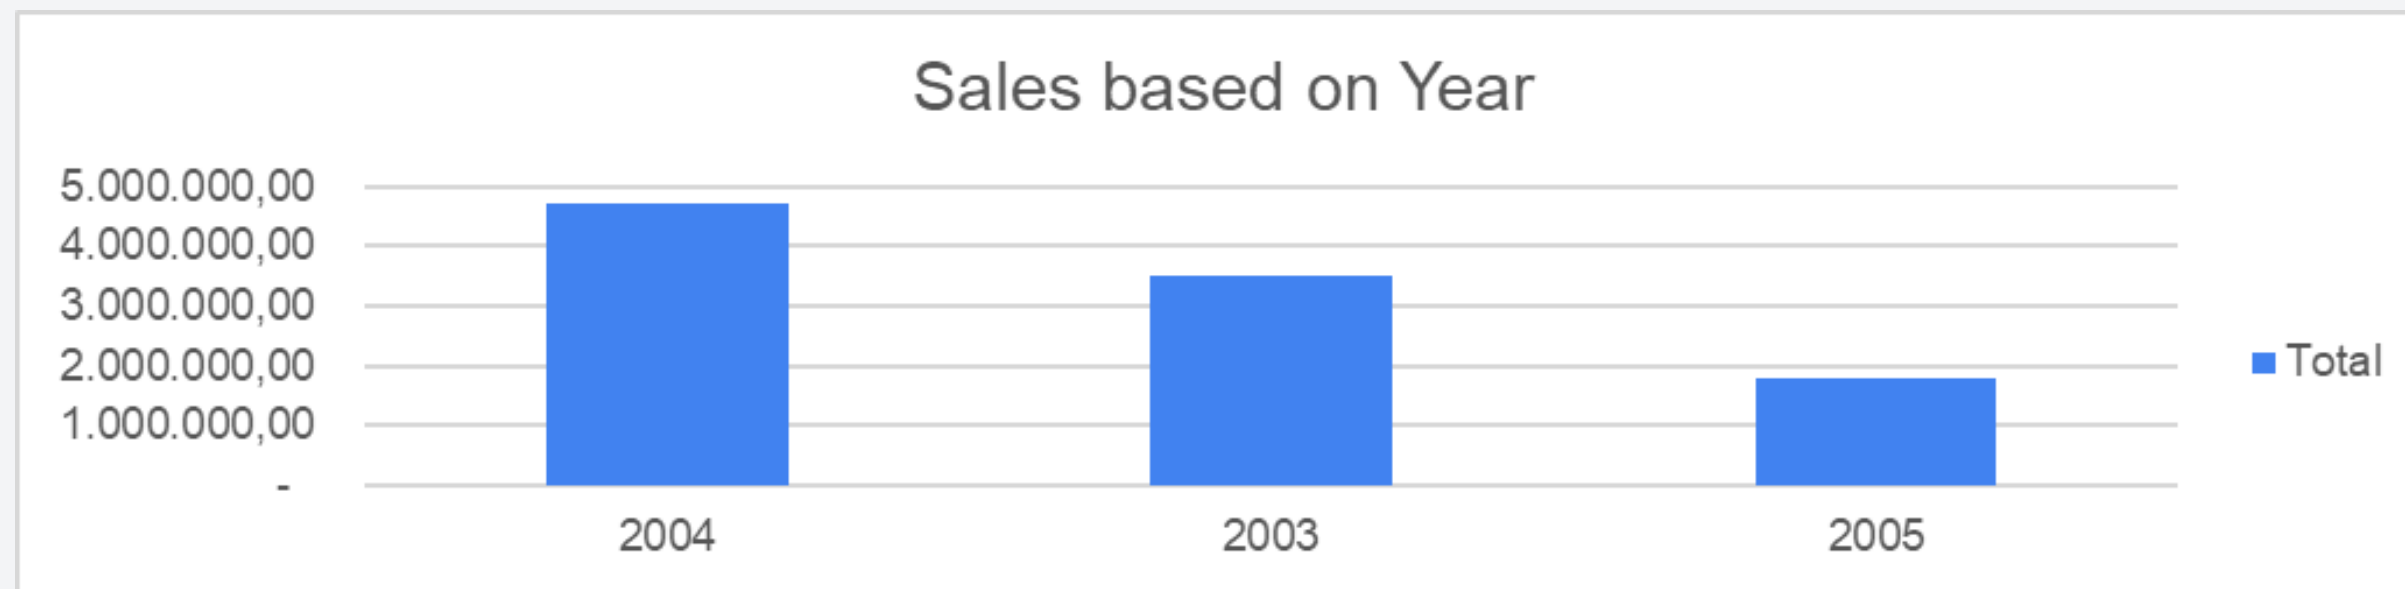

Block the pivot data, and go to 'PivotTable Analyze' and select PivotChart.

In first question, coloumn bar chart was chosen because reader can compare the difference between the year and the sales total effectively

Question 1:

identify the total sales for each year. which year had the highest total sales?

Based on the column chart, we can conclude that 2004 has the highest sales among the other years

Question 2:

Block all the data and go to pivot table in insert, and choose existing table/new worksheet.

Because I already prepared the data space, I choose the existing worksheet to make it simple

Question 3:

Which product line was sold the most (in quantity) throughout september 2003 to march 2004?

For this question, we have to choose two columns in rows, productline and orderdate, then quantityordered for the values

The screenshot shows the Microsoft Excel interface with a PivotTable and the PivotTable Fields task pane. The PivotTable is located in the range A42:B65 and shows the sum of QUANTITYORDERED for each product line. The PivotTable Fields task pane is open on the right, showing the fields available for the report.

Question 3:

Which product line was sold the most (in quantity) throughout September 2003 to March 2004?

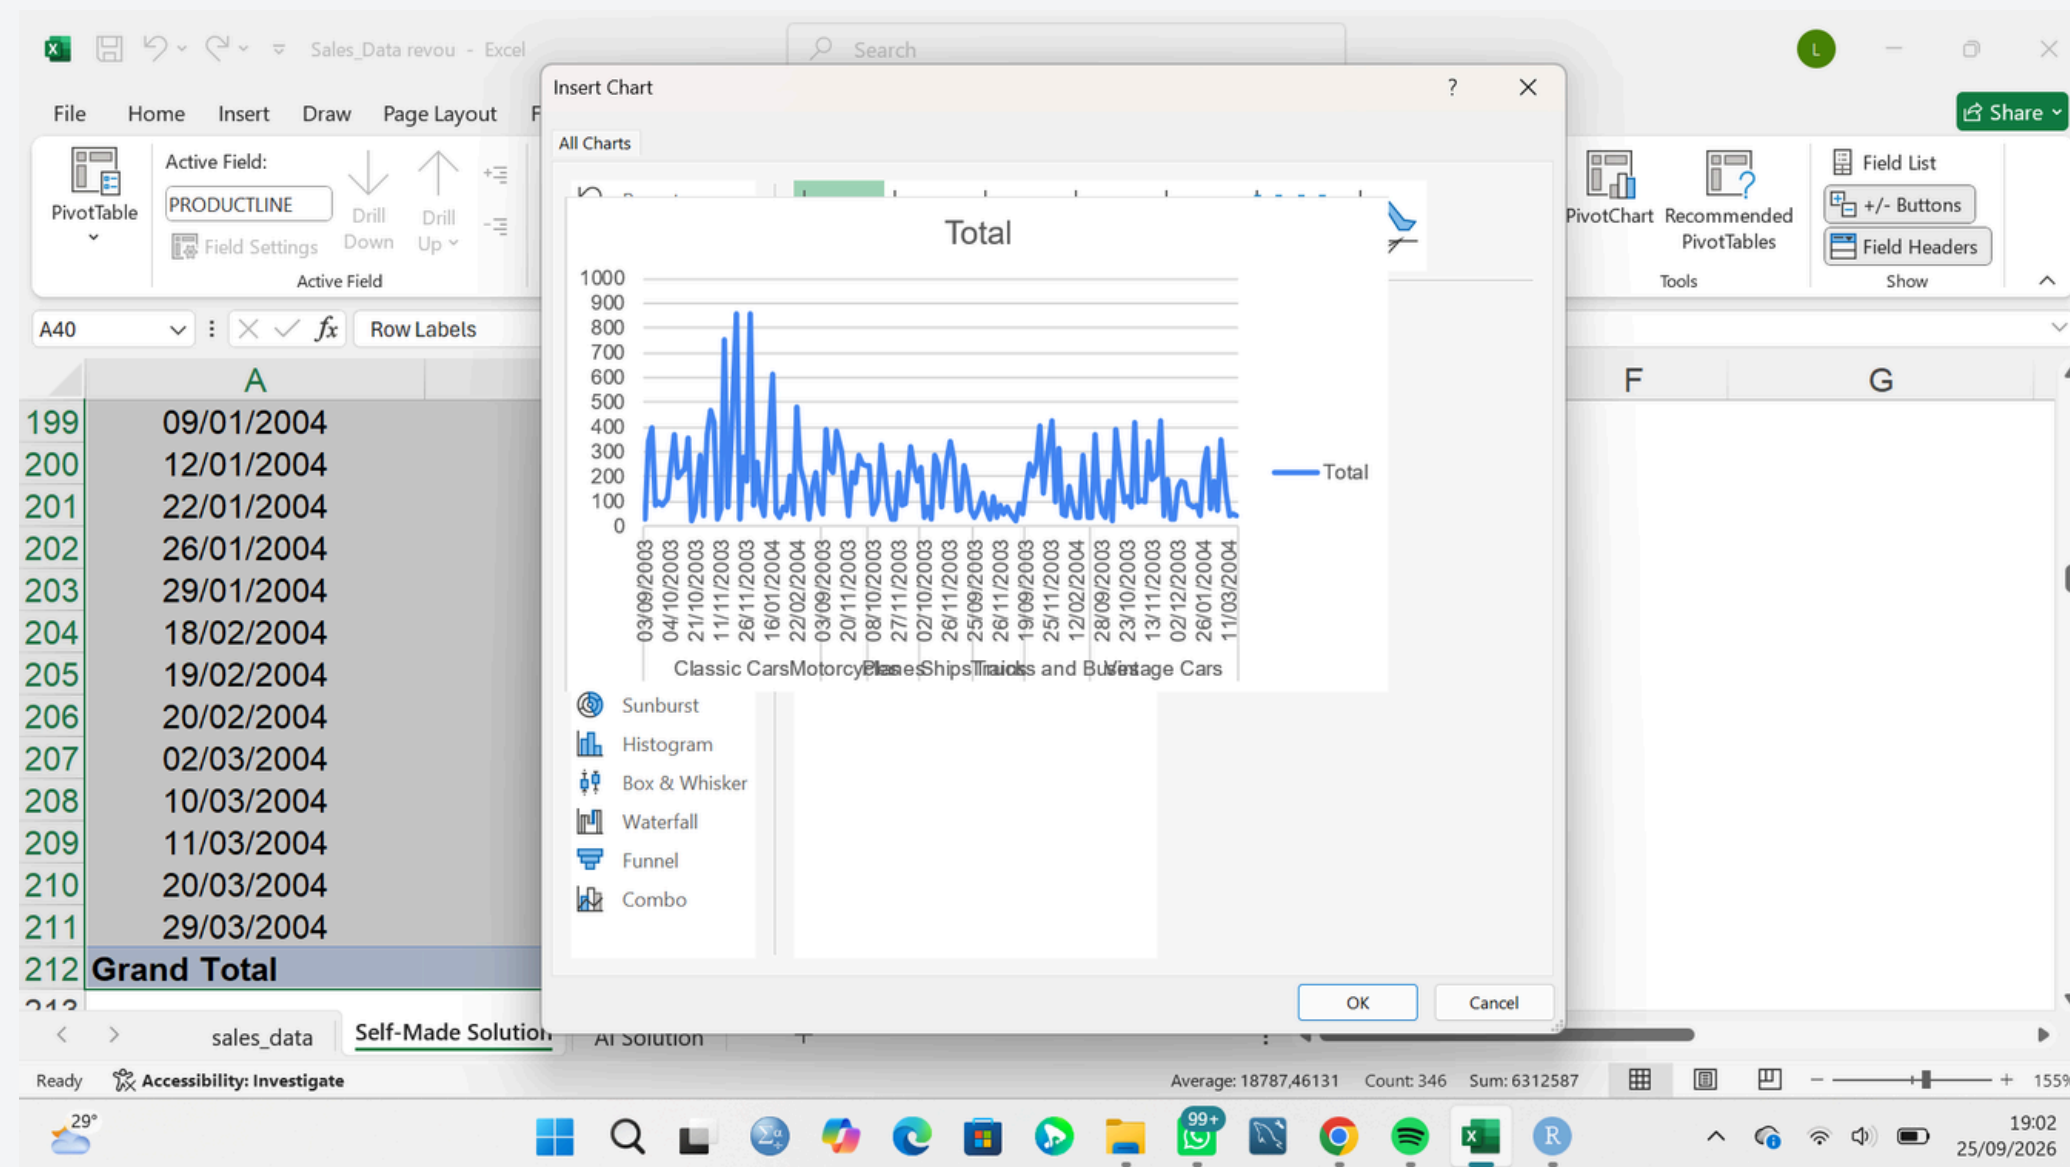

Choose 'is between' and determine to Sept 2003 and March 2004 then OK

The screenshot shows a 'Date Filter (ORDERDATE)' dialog box. The title bar includes tabs for 'Styles', 'Cells', 'Editing', and 'Add-ins'. The dialog has a close button (X) and a help button (?). The main area is titled 'Show items for which the date'. Below this, there is a dropdown menu showing 'is between'. To the right of the dropdown are two date input fields: the first contains '01/09/2003' and the second contains '31/03/2004', separated by the word 'and'. Each date field has a calendar icon to its right. Below the date fields is an unchecked checkbox labeled 'Whole Days'. At the bottom of the dialog are 'OK' and 'Cancel' buttons.

Question 3:

Which product line was sold the most (in quantity) throughout September 2003 to March 2004?

Block the pivot table, go to pivot chart. Because the data is periode comparisson, line chart is needed. Choose that than OK

Summary

This analysis demonstrates how pivot table can be explored and interpreted to gain useful insights easier. Through systematic examination and visualization, data becomes a solution and conclusion to gain insight and take decision
